Each image is displayed along with its key details: resolution, color depth, aspect ratio, DPI labels, EXIF and DMP. A built-in automatic is responsible for overexposed or discolored images for excellent results every time. Showing style photos Whether you enjoy your photos on your own or with friends, you will love the new presentation mode. Even the impressive collages no longer pose a problem! Ashampoo Photo Commander 16 offers a variety of options to make your ideas come true! Create slide shows Ashampoo Photo Commander 16 creates slide shows in high definition 4K! New transitions make for more beautiful and versatile scene transitions, while the added support for more audio formats allows a richer background audio. Apply great effects and go professional with gradation curves and tonal corrections. The great advantage of the application is a keyboard shortcut system that allows you to go through the program and have different options. This is compatible with a good range of formats, including PSD, many RAW variants, MPO/JPS 3D images, even (new this time) WEBP. The application offers a view of two windows, including the operation in the folders and files of your system. Features include automatic image optimization plus manual effects and various tools to recover colored images, remove stripes, fix red eyes and remove digital noise. EXIF and IPTC metadata are now displayed in the status bar and can be edited and exported freely. The program also has a presentation with resolutions up to 4K for soft presentations on multiple screens. Experienced photographers will appreciate the new view of the decade that provides a completely new look in their photo collections. What's new inThe client's wishes we fulfill we listen to you. You can filter your photos by type, age, name or label, describe them with one click, and then organize them on virtual discs for more than more reference.
